## End your Pool & Spa problems today!

Most problems with pools and spas are caused by the buildup of organic contaminants - Suntan oils, body lotions, personal care products, etc. They make the water cloudy, clog the filters, and produce ugly scum rings that are tough to remove. Chemical treatment may clear up these unsightly symptoms, but chemicals propose a number of potential health and environmental risks, and they are expensive and time-consuming to apply.

**Biodigesters™ Pool & Spa Treatment is the powerful, all-natural solution for crystal clear water.**

Containing beneficial bacteria and enzymes to specifically degrade organic contaminants, Biodigesters™ Pool & Spa Treatment provides clear, sparkling water for the whole family to enjoy. Biodigesters™ Pool & Spa Treatment is safe for people and pets, and contains no chlorine, bromine or other harsh chemicals.

Pool and spa owners can now spend less time, money, and hassle to keep their water clean and clear. Biodigesters™ Pool & Spa Treatment packs the power of nature into every jar, taking the work out of maintenance so you can play even more. Simply compare the benefits to other leading brands and you'll see why Biodigesters™ Pool & Spa Treatment is the best value overall

### Application and Dosing Rates

Seed Dose:  
1 Tbs. per 300 gallons

Maintenance:  
1 tsp. per 300 gallons each week

You simply mix the product into warm (not hot) water and evenly introduce it around the water.
